Career Objective:

To work in a dynamic and growth-oriented environment that fosters continuous learning and professional development, where I can effectively contribute my skills, knowledge, and dedication to achieving organizational goals, while continuously exploring and learning new technologies to enhance my capabilities and career potential. I am particularly interested in working with modern web technologies and have hands-on knowledge of HTML, CSS3, Tailwind CSS, JavaScript (ES6), React.js, Node.js, Python, MongoDB, MobaXterm (server), and Figma.

Technical Skills:

- **Programming Languages:** JavaScript(ES6)
- **Frontend Technologies:** React.js, Fluent UI 9, HTML5, CSS3
- **Backend Technologies:** Node.js, Python
- **Database:** MongoDB
- **Design Tool:** Figma
- **Others:** Docker, MobaXterm, Git, Postman

Experience:

STW E-Commerce Pvt Ltd – Full Stack Developer

September 2024 – Present

- Developed responsive user interfaces using **React.js** enhancing user experience and overall application performance.
- Redesigned the entire UI structure of the company's e-commerce platform to improve usability, navigation, and mobile responsiveness.
- Converted new UI layouts into fully functional front-end components using **React.js**.
- Integrated the new UI with existing backend systems built with Node.js and Express, ensuring smooth data flow and seamless functionality.
- Gained hands-on experience with **containerization and server operations**, including building, running, and pushing Docker images, as well as managing deployments and remote operations using MobaXterm.

Projects:

E - Commerce

- Contributed to the development and enhancement of key UI pages, including Checkout page, Homepage, Cart page, and Wishlist page.
- Implemented Cart page and Wishlist page functionalities using React.js with Redux for efficient state management.
- Worked on Home Page configurations by integrating both frontend and backend logic, enabling configurable updates to carousels, banners, and product cards with support for manual data uploads and frontend rendering.
- Ensured responsive design and smooth user experience across devices while maintaining consistent branding and layout.

ERP Application

January 2025 – July 2025

- Worked on both frontend and backend development, using Python for backend implementation.
- Developed and implemented a maintainable Python backend using layered architecture with dependency injection, separating business logic, database operations, and data models for better scalability and code reusability.
- Created dynamic charts displaying real-time data, fetched using optimized MongoDB queries in Python and developed RESTful APIs for CRUD operations.
- Implemented image handling features, including conversion to Base64 with compression, Webp format conversion, and Base64 encryption/decryption for secure storage and transmission.
- Implemented validation for inventory products and service bills to ensure only available products can be billed. Added checks for minimum stock quantity to display warnings and restrict billing when inventory falls below the required stock.

Education:

Bachelor of Engineering in Computer Science | CGPA - 8.54

S.A. Engineering College | Chennai, Tamil Nadu | 2020 - 2024
