PROFESSIONAL EXPERIENCE

Software Engineer | STW E-commerce Private Limited · Chennai, India

Jun **2024** – Feb **2026**

- Reduced server load by eliminating redundant and unnecessary API calls in critical user flows.
- Improved page performance by eliminating unused CSS and optimizing asset delivery.
- Enhanced API performance by adding MongoDB indexes to optimize query execution.
- Documented the code to improve clarity, long-term maintainability, and team collaboration.
- Implemented pagination with data limits, reducing page load time by 40% across pages.
- Optimized JavaScript by removing redundancy and reducing execution time from 4 ms to 0.9 ms.
- Centralized repeated logic into reusable functions, decreasing code redundancy by 30% and enhancing modularity and scalability.

Tech Stack: MongoDB, React.js, Node.js, TypeScript, Webflow, SQL, JavaScript, GraphQL, Docker, Lighthouse

Trainee Software Engineer | STW E-commerce Private Limited · Chennai, India

Mar 2024 – May 2024

- Architected responsive React.js UI components for a CMS, improving performance and usability across admin workflows.
- Led the React migration from v12 to v16; enhanced performance through code splitting and lazy loading.
- Built a coupon management system with configurable discounts and validation rules.
- Delivered responsive, mobile-first pages for the full e-commerce flow: Homepage, Product List, Cart, Wishlist, Checkout.

Tech Stack: React.js, Node.js, Redux, JavaScript, MongoDB, GraphQL, Material UI, Bootstrap, Chart.js, CSS

EDUCATION

M.Sc. Robotics and Autonomous Systems | University of Lübeck · Germany
Apr 2026 – Present
B.E. Computer Science and Engineering | S.A. Engineering College · Chennai, India
Aug 2020 – Apr 2024
Final Grade: 1.9 (German grading)

PROJECTS

Medicinal Plant Identification Using Deep Learning
Python · OpenCV · Matplotlib · Kaggle Dataset · CNN

- Developed an end-to-end medicinal plant identification system, covering data preprocessing, model development, and deployment using deep learning techniques.
- Integrated CNN and Random Forest models to improve classification performance through combined deep feature extraction and traditional machine learning methods.
- Achieved 96.5% accuracy on a Kaggle dataset while generating medicinal information outputs for identified plants.

Enterprise Resource Planning (ERP) application

Python · React.js · MongoDB · REST APIs · Postman · Material UI · CSS · HTML

- Implemented user login history tracking (username, role, role ID, login and logout time).
- Developed a room availability module displaying room numbers and real-time availability status.
- Created a live attendance dashboard integrated with the ESSL biometric API for real-time employee attendance tracking.
- Implemented a daily sales dashboard showing customer name, date, and payment method used (Cash, UPI, Membership, Bank Transfer, Promotion, Card Machine, Guest).

SKILLS

Frontend:	React.js (Expert), Angular(Intermediate), JavaScript (Expert), TypeScript (Intermediate), Vue.js(Basic), PHP(Basic), Bootstrap, Material UI, Chart.js, Figma, SCSS, CSS3, HTML5
Backend:	Python (Expert), Node.js (Expert), Java(Basic)
Databases:	SQL (Intermediate), PostgreSQL (Intermediate), MongoDB (Intermediate)
DevOps / CI/CD:	Docker, CI/CD Pipelines
OS/Tools:	Linux, Git, GitHub, Bitbucket, GitLab, Microsoft Office (Word, Excel, PowerPoint)
Testing:	Jest, Cypress
Other Tools:	Context API, REST APIs, Postman, GraphQL, MobaXterm, JSDoc

LANGUAGES

English:	Proficient – Level C1 (CEFR)
German:	Level A2 (CEFR); currently preparing for B1
