SUMMARY

Software Engineer with 2 years of professional experience in React.js, Node.js, and Python, specializing in web and software development. Skilled in building scalable applications, optimizing performance, and writing clean, maintainable code. Continuously expanding technical expertise and contributing effectively in collaborative development environments. Quick to learn new technologies and adapt to evolving project requirements. Currently pursuing a Master's in Robotics and Autonomous Systems at the University of Lübeck, Germany, and seeking to add immediate value in a Software Engineer Werkstudent role through strong technical and problem-solving skills.

SKILLS

- **Front-end Technologies:** React.js, JavaScript, TypeScript, Bootstrap, Material UI, Fluent UI 9, Chart.js, CSS, HTML5
- **Back-end Technologies:** Python, Node.js, MongoDB
- **DevOps:** Docker
- **Version Control:** Git, GitHub, Bitbucket, GitLab
- **Other Tools:** Context API, REST APIs, Postman, GraphQL, MobaXterm, JSDoc

EXPERIENCE

STW E-commerce Private Limited | Chennai

Software Engineer | 06/2024 - 02/2026

- Reduced server load by eliminating redundant and unnecessary API calls in critical user flows.
- Improved page performance by eliminating unused CSS and optimizing asset delivery.
- Optimized images (resizing, WebP conversion) to reduce asset size and enhance page speed.
- Enhanced API performance by adding MongoDB indexes to optimize query execution.
- Documented the code to improve clarity, long-term maintainability, and team collaboration.
- Implemented pagination with data limits, reducing page load time by 40% across pages.
- Eliminated unused JavaScript to improve initial load performance, reducing execution time from 4 ms to 0.9 ms.
- Centralized repeated logic into reusable functions, decreasing code redundancy by 30% and enhancing modularity and scalability.

Tech Stack: MongoDB, Chrome DevTools, Lighthouse, JSDoc, React.js, Node.js, TypeScript, Redux, JavaScript, GraphQL, Docker

STW E-commerce Private Limited | Chennai

Trainee Software Engineer | 03/2024 - 05/2024

- Architected responsive React.js UI components for a CMS, improving performance and usability across key admin workflows.
- Created a coupon management system with configurable discounts and validation rules.
- Created a Wallet page that enables administrators to retrieve and display customer balances using ID-based validation.
- Led React v14 to v16 migration, improving performance and maintainability.
- Optimized React app performance through code splitting, lazy loading, and efficient component rendering to enhance page load speed.
- Delivered responsive, mobile-first pages across the full e-commerce flow – Homepage, Product List Page, Single Product Page, Cart, Wishlist and Checkout.

Tech Stack: React.js, Node.js, Redux, JavaScript, MongoDB, GraphQL, Material UI, Bootstrap, Chart.js, CSS

PROJECT

Medical Plant Identification Using Deep Learning

- Built an end-to-end plant identification system from preprocessing to deployment. Developed
 - a deep learning image classifier for accurate plant identification.
 - Integrated CNN and Random Forest models to enhance classification accuracy through combined deep feature extraction and traditional ML techniques.
 - Optimized an automated plant identification system with medicinal information output.
 - Achieved 96.5% accuracy on the Kaggle dataset using CNN and a Random Forest-based plant classifier.
 - **Tech Stack : Python, Matplotlib , Kaggle, OpenCV**
-

EDUCATION

University of Lübeck | Lübeck | Germany

Master's in Robotics and Autonomous Systems | 04/2026 - Present

S.A. Engineering College | Chennai, India

Bachelor's in Computer Science and Engineering (German Grade: 1.9) | 04/2024

Santiniketan Matriculation Higher Secondary School | Theni | Tamil Nadu

Higher Secondary School | 03/2020

LANGUAGES

- English - B2
- German - A2 (Currently pursuing B1)
