SUMMARY

Software Engineer with professional experience in React.js, Node.js, and Python, with a strong background in web and software development. Skilled in building scalable applications, optimizing performance, and maintaining clean, well-documented code. Continuously exploring new technologies while strengthening expertise in established tools and frameworks. Able to contribute effectively in collaborative development environments and committed to delivering reliable, user- focused software solutions.

SKILLS

- **Front-end Technologies:** React.js, JavaScript, Bootstrap, Material UI, Chart.js, CSS, HTML
 - **Back-end Technologies:** Python, Node.js, MongoDB
 - **DevOps:** Docker
 - **Version Control:** GitHub, Bitbucket
 - **Other Tools:** Context-API, GraphQL
-

EXPERIENCE

STWE-commerce Private Limited | Chennai

Software Engineer | 09/2024 - 02/2026

- Reduced server load by eliminating redundant and unnecessary API calls in critical user flows.
- Improved page performance by eliminating unused CSS and optimizing asset delivery.
- Optimized images (resizing, WebP conversion) to reduce asset size and enhance page speed.
- Enhanced API performance by adding MongoDB indexes to optimize query execution.
- Documented the code to improve clarity, long-term maintainability, and team collaboration.
- Implemented pagination with data limits, reducing page load time by 40% across pages.
- Eliminated unused JavaScript to improve initial load performance, reducing execution time from 4 ms to 0.9 ms.
- Centralized repeated logic into reusable functions, decreasing code redundancy by 30% and enhancing modularity and scalability.

STW E-commerce Private Limited | Chennai

TraineeSoftwareEngineer | 03/2024-08/2024

Content Management System (CMS):

- Designed responsive UI components in React.js to improve CMS performance and usability.
- Created a coupon management system with configurable discounts and validation rules.
- Created a Wallet page that enables administrators to retrieve and display customer balances using ID-based validation.

E-commerce Website UI design changes:

- Contributed to the migration project by integrating Next.js and upgrading React from v14 to v16, improving performance and maintainability.
- Applied Next.js SSR and SSG to enhance rendering efficiency and content delivery.
- Displayed BAU and BAI product categories with country-specific flag indicators.
- Implemented an image magnifier on the product page to enhance product visibility and user experience.
- Developed responsive, mobile-friendly pages for Homepage, Product Listing, Product Details, Cart, and Checkout.
- Resolved legacy bugs and stability issues, improving overall application reliability by 30%.

PROJECT

MedicalPlant Identification Using Deep Learning

- Built an end-to-end plant identification pipeline from data preprocessing to model deployment.
- Initiated a deep learning image classifier to extract visual features for accurate plant identification.
- Integrated CNN and Random Forest models to enhance classification accuracy through combined deep feature extraction and traditional ML techniques.
- Optimized an automated plant identification system with medicinal information output.
- Achieved 96.5% accuracy on the Kaggle dataset using CNN and a Random Forest-based plant classifier.

EDUCATION

University of Lübeck | Lübeck | Germany

Master's in Robotics and Autonomous Systems | 03/2026 - 03/2028

S.A. Engineering College | Chennai | Tamil Nadu

Bachelor's in Computer Science and Engineering | 04/2024

Santiniketan Matriculation Higher Secondary School | Theni | Tamil Nadu

Higher Secondary School | 03/2020

LANGUAGES

- English - B2
- German - A2 (Currently pursuing B1)

Declaration

I hereby declare that the above particulars of information and facts stated are true to the best of my knowledge and belief.
