Portfolio: <https://haranportfolio.vercel.app/>

Career Objective:

To contribute my skills, knowledge, and dedication in a dynamic, growth-oriented environment that encourages continuous learning and professional development. I aim to leverage my hands-on experience with modern web technologies including HTML, CSS3, Tailwind CSS, JavaScript (ES6), React.js, Node.js, Python, MongoDB, MobaXterm, and Figma to achieve organizational goals while continuously enhancing my technical capabilities and career growth.

Technical Skills:

- **Programming Languages:** JavaScript(ES6)
- **Frontend Technologies:** React.js, Fluent UI 9, HTML5, CSS3
- **Backend Technologies:** Node.js, Python
- **APIs:** GraphQL, REST APIs
- **Database:** MongoDB
- **Design Tool:** Figma
- **Others:** Docker, MobaXterm(Server), Git, Postman

Experience:

STW E-Commerce Pvt Ltd – Trainee Software Engineer

September 2024 – November 2024

E-Commerce Website UI Design changes:

- Redesigned the UI structure of the company's e-commerce platform to enhance usability, navigation, and mobile responsiveness.
- Converted new UI layouts into fully functional React.js components and integrated them with backend systems
- Designed and enhanced key UI pages such as Checkout, Homepage, Cart, and Wishlist using React.js and Redux for efficient state management.

Content Management System (CMS):

- Built an efficient sidebar search component that enables users to quickly locate screens and navigate the system with improved speed and accuracy.

- Developed a comprehensive Category Management page, implementing product categorization by category, brand, and product group, and contributed to both frontend architecture and backend data handling for seamless functionality.
- Created a Manual Order Management page, allowing bulk orders, internal users to place, review, and manage orders directly through the CMS with improved workflow efficiency.

STW E-Commerce Pvt Ltd – Software Engineer

December 2024 – Present

- Gained practical experience with Docker containerization and server management using MobaXterm for deployments and remote operations.
- Developed backend logic to support manual updates for carousels, banners, and product cards and their integration.
- Integrated React.js components with Node.js and Express backend systems, ensuring smooth data flow for scalable operations.
- Optimized backend logic in GraphQL to achieve faster response times and improved efficiency across core services.

Project:

ERP Application

April 2025 – October 2025

- Developed frontend interfaces along with a Python backend using layered architecture and dependency injection to ensure maintainable and scalable code.
- Separated API endpoint URLs, business logic, and database operations into separate files, injecting them where needed for better modularity and reusability.
- Built dynamic charts with real-time data visualization using optimized MongoDB queries and developed RESTful APIs for CRUD operations.
- Added inventory validation with stock-level warnings and billing restrictions to ensure accurate and compliant inventory management.

Education:

Bachelor of Engineering in Computer Science | CGPA - 8.54

S.A. Engineering College | Chennai, Tamil Nadu | 2020 – 2024

Languages:

- English
- Tamil
